## Editorial

303 Searching for connections

## Comments

304 Lakes as model systems for understanding global change  
*Charlie J. G. Loewen*

307 The co-production of knowledge for climate science  
*Kimberley Miner et al.*

309 Representation of adaptation in quantitative climate assessments  
*Nicole van Maanen et al.*

## Research highlights

312 Our choice from the recent literature

## News & views

313 *Coastal risks*  
Defence against the rising seas  
*David R. Johnson*

315 *Biotic interactions*  
Response to climate change can be altered by species competition  
*Mathieu Videlier*

## Policy brief

317 *Net-zero emissions*  
Countries' long-term climate strategies fail to define residual emissions  
*Holly Jean Buck, Wim Carton, Jens Friis Lund & Nils Markusson*

## Research briefings

320 Lake temperature and nutrient levels interact to reorganize ecological networks

322 Risk of isolation increases the urgency and spatial extent of climate change adaptation

## ON THE COVER

Climate-change-associated ocean deoxygenation is a growing threat to marine ecosystems, including tropical coral reefs. In this issue, Pezner et al. use data from 32 coral reef habitats to demonstrate that hypoxic (low oxygen) conditions are already occurring on tropical coral reefs and that hypoxic event intensity, duration and severity will increase under continued ocean warming.

### Analysis p403

## Perspective

324 Trophic rewilding can expand natural climate solutions  
*Oswald J. Schmitz et al.*

## Matters arising

334 Autumn cooling paused increased CO<sub>2</sub> release in central Eurasia  
*Masayuki Kondo, Motoki Sasakawa, Toshinobu Machida, Mikhail Arshinov & Tetsuya Hiyama*

338 Reply to: Autumn cooling paused increased net CO<sub>2</sub> release in central Eurasia  
*Rui Tang & Bin He*

## Articles

341 Diverse carbon dioxide removal approaches could reduce impacts on the energy–water–land system  
*Jay Fuhrman et al.*

351 Why residual emissions matter right now  
*Holly Jean Buck, Wim Carton, Jens Friis Lund & Nils Markusson*  
See PB p317

359 The timing of decreasing coastal flood protection due to sea-level rise  
*Tim H. J. Hermans et al.*  
See N&V p313

367 Increased exposure of coastal cities to sea-level rise due to internal climate variability  
*M. Becker, M. Karpytchev & A. Hu*

375 Large sinuous rivers are slowing down in a warming Arctic  
*Alessandro Ielpi, Mathieu G. A. Lapôtre, Alvise Finotello & Pascale Roy-Léveillé*
