

## Contents

### GENETICS AND BREEDING

- Breeding for hygienic behavior in honey bees (*Apis mellifera*): a strong paternal effect**  
Rya Seltzer, Yosef Kamer, Paz Kahanov, Aleksandra Splitt, Małgorzata Bieńkowska, Abraham Hefetz, and Victoria Soroker 419

### BEE MANAGEMENT

- A national survey of managed honey bee colony losses in the USA: results from the Bee Informed Partnership for 2017–18, 2018–19, and 2019–20**  
Selina Bruckner, Mikayla Wilson, Dan Aurell, Karen Rennich, Dennis vanEngelsdorp, Nathalie Steinhauer, and Geoffrey R. Williams 429

- Effects of hive entrance orientation on honey bee colony activity**  
William G. Meikle, Milagra Weiss, and Eli Beren 444

- Delayed flight time of drones and queens as a method for mating control in small-scale honey bee breeding**  
Eduard Musin, Kaspar Bienefeld, Hartmut Skerka, and Jakob Wegener 450

- Multivariate approach to analyzing survey data: a case study of beekeeping in Lebanon**  
Rita El Hajj, Nabil Nemer, Wadih Skaff, and Nathalie Estephan 459

- A methodology to assist in locating drone congregation area using remote sensing technique**  
Hossam F. Abou-Shaara and Mahmoud M. Kelany 468

- Summer indoor queen banking as an alternative to outdoor queen banking practices**  
Anna Webb, Stephen O. Onayemi, Rae L. Olsson, Kelly Kulhanek, and Brandon K. Hopkins 471

- Effect of harvesting time and the number of queen cell cups on royal jelly composition**  
Aytul Ucak Koc, Mete Karacaoglu, Murat Uygun, Zehra Burcu Bakır, and Burcu Keser 478

### PATHOLOGY AND PARASITOLOGY

- Preliminary analysis shows that feral and managed honey bees in Southern California have similar levels of viral pathogens**  
Amy Geffre, Dillon Travis, Joshua Kohn, and James Nieh 485

- Pathogenicity bioassays of *Ascosphaera apis* strains from Spanish provinces in bee larvae from Northern Argentina**  
Marcos Raúl Tejerina and Marcelo Rafael Benitez-Ahrendts 488

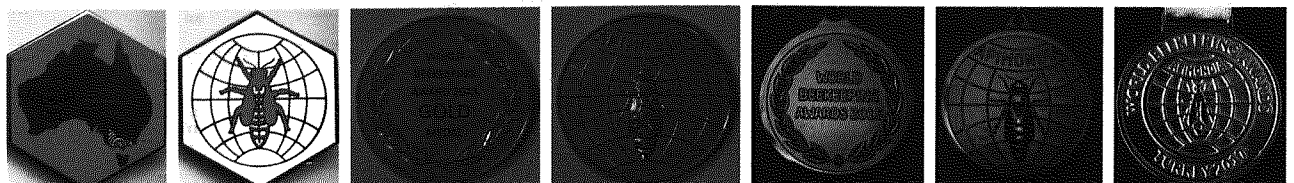

- A small scale survey in Morocco revealed the presence of four honey bee viruses**  
Mohamed Afechtal, Majid Mounir, Khaled Djelouah, Maria Saponari, and Raied Abou Kubaa 496

- A novel method in small hive beetle rearing**  
Charles J. Stuhl 502

- Estimation of honey bee colony infection with *Nosema ceranae* and *Varroa destructor* using fluorescence spectroscopy in combination with differential scanning calorimetry of honey samples**  
Mira Stanković, Dragana Bartolić, Dragosav Mutavdžić, Smilja Marković, Saša Grubić, Nemanja M. Jovanović, and Ksenija Radotić 507

- First detection of *Nosema ceranae* in honey bees (*Apis mellifera* L.) of the Macaronesian archipelago of Madeira**  
Ana R. Lopes, Raquel Martín-Hernández, Mariano Higes, Sara Kafafi Segura, Dora Henriques, and M. Alice Pinto 514

(Continued on inside back cover)

## HIVE PRODUCTS SCIENCE

### Bioactive and physicochemical profile of honey collected from Colombian organic and conventional coffee growing areas

Edith Castro, Marta Quicazán, Andrea Mojica, and Carlos Zuluaga-Domínguez

518

### Storage conditions significantly influence the stability of stingless bee (*Melipona scutellaris*) honey

Larissa Farias da Silva Cruz, Paulo Vitor França Lemos, Thaís de Souza Santos, Pedro Paulo Lordelo Guimarães Tavares, Renata Quartieri Nascimento, Leila Magda Rodrigues Almeida, Carolina Oliveira de Souza, and Janice Izabel Druzian

530

### Assessing the performance of analytical methods for propolis – A collaborative trial by the international honey commission

M. Vilas-Boas, M. Lopes, L. F. Nunes, A. Pereyra, C. Kunert, G. Beckh, O. G. Çelemlı, K. Sorkun, S. Georgé, L. Paulo, S. Gardini, M.T. Sancho, S. M. Osés, M. A. Fernández-Muñio, V. Bankova, M. Popova, B. Trusheva, N. Petrov, T. Dastan, C. Tananaki, and S. I. Falcão

542

### Markers for the spatial and temporal differentiation of bee pollen harvested by *Apis mellifera* L. in the Eastern Andes of Colombia

Luis Carlos Casas Restrepo, Ilver Eduardo Gutierrez Alabat, Guillermo Salamanca Grosso, and Francisco de Assis Ribeiro dos Santos

556

### Rheological determination of molecular weight of honey adulterated with high fructose corn syrup

Vincent Okechukwu Anidiobu

570

### Characterization of Brazilian monofloral and polyfloral honey by UHPLC-MS and classic physical-chemical analyses

Mariana Degaki Archilia, Amandio Augusto Lagareiro Neto, Maria Cristina Marcucci, Roberta Caroline Bruschi Alonso, Thaiana Cristina de Camargo, Ricardo Costa Camargo, and Alexandra Christine Helena Frankland Sawaya

578

### Organic zinc supplementation modifies the metalloproteome of royal jelly produced by *Apis mellifera*

Marcelo P. Camilli, Daniel C. B. de Barros, Gabriel M. Martineli, Aimê A. Longuini, Samir Moura Kadri, José Cavalcante S.Vieira, Pedro de Magalhães Padilha, and Ricardo de Oliveira Orsi

590

## ECOLOGY AND CONSERVATION

### A subset of wild bee species boosts the pollination of pigeon pea (*Cajanus cajan*: Fabaceae), an important crop plant of Cameroon

Sanda Mazi, Robert J. Paxton, and Julia Osterman

598

### Response of foragers of the giant Himalayan honey bee, *Apis laboriosa*, to microclimates in agro-net and climate control greenhouses

Hiren Gogoi, Ruby Taid, Biraj Ballav Boruah, Chihi Umbrey, and Gumnya Ete

607

### More time to fly: with a warming climate the Western honey bee (*Apis mellifera*, Linnaeus) now has more temperature-eligible flight hours than 40 years ago

Richard Rogers, Edgar Hassler, Quinn Carey, and Joseph Cazier

615

## PHYSIOLOGY, BIOCHEMISTRY, AND CHEMICAL ECOLOGY

### Identification and characterization of adipokinetic hormone and its receptor in bumble bee queens, *Bombus lantschouensis*

Huipeng Yang, Jiaying Huang, Jilian Li, and Jie Wu

625

## SOCIOBIOLOGY AND BEHAVIOUR

### Bumble bee nest thermoregulation: a field study

Anton Gradišek, Jani Bizjak, Aleksej Popovski, and Janez Grad

634

### The impact of smoke and fogged/vaporized thyme oil on honey bee (*Apis mellifera*) survival and behavior *in vitro*

Hossam Abou-Shaara, Cameron Jack, and James D. Ellis

643
