

# ALLELOPATHY JOURNAL

Indexed in Web of Science, SCOPUS, Google Scholar, UGC Approved, NAAS Rating  
FREE OPEN ACCESS 1994-2022 : VOLUMES 1-57 (1994-2022) Except Current Year

Volume 59

Number 1

May 2023

## Editor-in-Chief M.J. Reigosa, Spain DISCOUNTED PUBLICATION CHARGES

In 2023, allelopathy Journal will complete 30-Years of its successful Publication. To celebrate this occasion, the Journal has decided to provide Discount in Publication Charges to Authors (unable to pay these Charges from poor economy countries). For this Discount, Author should request Chief Editor, he will decide the Amount of Discount. Please circulate this information to other Allelopathy Research Groups in your country.

## EXPANDED SCOPE OF ALLELOPATHY JOURNAL FROM 2023

Allelopathy is defined as in-vivo interactions between plants, microbes and animals. Until 2020, we published articles mainly related to Agriculture and Biological sciences. Since then, it is felt that the journal should expand its scope to include articles related to use of plant chemicals in human and animal health. With increased resistance to prevalent antibiotics, there is now greater interest in testing new plant chemicals, which have pharmaceutical properties to control a variety of human diseases such as cancer, diabetes etc. Further, it is also seen that some of the plant chemicals improve human and animal immunity to diseases. It is therefore felt that the journal should expand its scope and include the role of plant chemicals and microbial metabolites in human and animal health. Thus researchers may submit manuscripts related to the influence of plant chemicals on human and animal health. Manuscripts related to improving plant metabolites production through modern biotechnological applications are also welcome.

## REVIEW

**Chang-Hung Chou and Chao-Min Wang (Taiwan).** Allelopathy Research: Past, Present and Future--II. Managed Ecosystems 1

## RESEARCH PAPERS

- Di Wu, Xue Wang, Peng Yin, Junkang Zhang, Yu Cui and Jichen Xu (China).** 21  
Allelopathic effects of *Salix matsudana* (Koidz) root exudates on soil bacterial diversity
- F.Y. Zhang, L.X. Chang, Q.Y. Zhang and S.S. Ye (China).** 33  
Allelopathic potential of medicinal plants (*Eucalyptus urophylla*, *Litsea rotundifolia*, *Rhodomyrtus tomentosa*, *Schefflera heptaphylla*, *Toxicodendron succedaneum*) in island habitats: influence of wind and salt stress
- K. Sangeetha, C. Swaminathan, E. Subramanian, B. Sivasankari and P. Kannan (India).** 49  
Influence of tree botanicals on seed germination and enzyme activity in blackgram (*Vigna mungo* L.) and cowpea (*Vigna unguiculata* L.)
- Syeda Fakehha Naqvi, Arshad Javaid and Iqra Haider Khan (Pakistan).** 69  
Fungicidal activity of stem extract of *Chenopodium murale* L. against the pathogen of Fusarium wilt of tomato
- Hadda Yahia, Fouzia Djebbar, Djahida Mahdi and Nouredine Soltani (Algeria).** 81  
Insecticidal activity of *Eucalyptus g'obulus* (Labill) essential oil against *Culiseta longiareolata* (M., 1838) (Diptera: Culicidae)
- Jingchao Chen, Ying Zheng, Li Ma, Yulin Pan, He Yang and Xiangju Li (China).** 95  
Effects of applied glyphosate on shikimate and chlorophyll contents in 3-weed species *Eleusine indica* L. Gaertn, *Echinochloa crusgalli* L. Beauv and *Amaranthus retroflexus* L.
