SPECIAL ISSUE: ENVIRONMENTAL CHANGE MANAGEMENT WITH ADVANCED TECHNOLOGIES – PART 2

Guest Editor: Professor X.Q. Liu

- 173 **Prediction method of change trend of energy carbon emission intensity based on time series analysis**
Yingjie Zhang and Dongyuan Zhao
- 186 **Monitoring method of crop growth environment in greenhouse based on embedded 5G communication technology**
Qiong-Pei Wang
- 200 **Evaluation model of carbon emission efficiency of land intensive use based on SBM model**
Liangang Mo
- 216 **Research on spatial pattern recognition of landscape architecture based on multi-source remote sensing images**
Shujing Wang
- 232 **An accounting method of REDD reduction of renewable energy based on power flow distribution matrix**
Wenwei Zhu, Baichong Pan, Qingcui Liu, Yanfeng Wang and Dao Shi

Additional Papers

- 242 **Greenhouse heating efficiency through soap bubble insulation**
Donald Tobi, Margaret Skinner, Arash Ghalehbolabbehbahani, Norman C. Rosberg, Cheryl F. Sullivan, Paul Reese and Bruce L. Parker
- 255 **The treatment of micro-polluted waterbodies using composite flocculant**
Qun Liu
