

## Aims and Scope

Trauma causes individual patterns of injury and involves shock, fractures, soft tissue and organ injuries.

Treatment therefore requires the joint effort of emergency medicine, orthopedic and trauma surgery, critical care medicine and rehabilitation. Both scientific progress and the in-depth experimental and clinical research within individual disciplines contribute to the ongoing continuous improvement of trauma care.

The EUROPEAN JOURNAL OF TRAUMA aims to open an interdisciplinary forum that allows for the scientific exchange between basic and clinical science related to pathophysiology, diagnostics and treatment of traumatized patients. The journal covers all aspects of clinical management, operative treatment and related research of traumatic injuries.

Clinical and experimental papers on issues relevant for the improvement of trauma care will be published. Reviews, original articles, short communications and letters will allow the appropriate presentation of major and minor topics. The papers published are allocated to one of the following sections of the journal: **Experimental Research, Hand Trauma, Intensive Care, Neurotrauma, New Materials – Tissue Engineering, Orthopedic Trauma, Pediatric Trauma, Pelvic Trauma, Reconstructive Surgery, Polytrauma, Spine Trauma, Sports Injuries, Thoracic and Abdominal Trauma.**

The EUROPEAN JOURNAL OF TRAUMA invites articles not only from Europe but also from the United States, Japan, and other countries. The journal is peer-reviewed according to international standards and each paper submitted will be scrutinized by two or three referees and a biostatistical consultant. For articles describing important new findings, accelerated peer-review and fast track publication are made available.

## REVIEW ARTICLE

- 267 Gender-Specific Immune Response Following Shock: Clinical and Experimental Data**  
M. K. Angele, E. Faist

## ORIGINAL ARTICLES

- 278 Therapeutical Strategies and Outcome of Polytraumatized Patients with Pelvic Injuries. A Six-Year Experience**  
W. Ertel, K. Eid, M. Keel, O. Trentz
- 287 Complications and Problems in Intramedullary Nailing of Children's Fractures**  
P. P. Schmitteneber, H. G. Dietz, W. E. Linhart, T. Slongo
- 294 Medium-Term Course of Clinical Function and Progression of Osteoarthritis after Primary Reconstruction of Anterior Cruciate Ligament: 5- to 8-Year Results**  
A. Jäger, C. Eberhardt, A. H. Kurth, M. Rittmeister
- 300 Evidence for Early Bacteremia/Endotoxemia and Inflammatory Responses after Trauma – Hemorrhage and Complement Activation in a Nonhuman Primate Model**  
H. Redl, S. Bahrami, W. Fürst, A. Schiesser, G. Schlag, T. E. Mollnes

## CASE STUDIES

- 308 Spiral Fracture of the Humerus Caused by Arm Wrestling**  
U. Ahčan, A. Aleš, J. Završnik
- 312 ACL Rupture Caused by a Fast Narrow Turn on Super Sidecut Skis**  
D. F. Kalbermatten, S. E. Anderson, F. T. Ballmer
- 315 Irreducible Displacement of Comminuted Metacarpal Head Fracture**  
T. Neubauer, M. Quell, M. Wagner
