

Official Publication of the European Trauma Society

## Aims and Scope

Trauma causes individual patterns of injury and involves shock, fractures, soft tissue and organ injuries. Treatment therefore requires the joint effort of emergency medicine, orthopedic and trauma surgery, critical care medicine and rehabilitation. Both scientific progress and the in-depth experimental and clinical research within individual disciplines contribute to the ongoing continuous improvement of trauma care.

The EUROPEAN JOURNAL OF TRAUMA aims to open an interdisciplinary forum that allows for the scientific exchange between basic and clinical science related to pathophysiology, diagnostics and treatment of traumatized patients. The journal covers all aspects of clinical management, operative treatment and related research of traumatic injuries.

Clinical and experimental papers on issues relevant for the improvement of trauma care will be published. Reviews, original articles, short communications and letters will allow the appropriate presentation of major and minor topics. The papers published are allocated to one of the following sections of the journal: **Experimental Research, Hand Trauma, Intensive Care, Neurotrauma, New Materials – Tissue Engineering, Orthopedic Trauma, Pediatric Trauma, Pelvic Trauma, Reconstructive Surgery, Polytrauma, Spine Trauma, Sports Injuries, Thoracic and Abdominal Trauma.**

The EUROPEAN JOURNAL OF TRAUMA invites articles not only from Europe but also from the United States, Japan, and other countries. The journal is peer-reviewed according to international standards and each paper submitted will be scrutinized by two or three referees and a biostatistical consultant. For articles describing important new findings, accelerated peer-review and fast track publication are made available.

## REVIEW ARTICLE

- 144 Is the Posterior Wall Avulsion the Simplest Acetabular Fracture?**  
P. M. Rommens, M. V. Giménez, M. H. Hessmann

## ORIGINAL ARTICLES

- 155 Retrograde Nailing of Distal Femoral Fracture – Clear and Potential Indications\***  
F. Walcher, J. Frank, I. Marzi
- 169 Radioscapholunate Fusion Following Comminuted Fractures of the Distal Radius**  
K. Beyermann, K.-J. Prommersberger, U. Lanz
- 176 Evidence for a Sustained Inflammatory Response of the Hepatic Microcirculation after Hemorrhagic Shock**  
C. Bauer, W. Kuntz, M. Bauer, R. Larsen, I. Marzi
- 185 Rehabilitation of Geriatric Patients with Cervical Spinal Cord Lesions**  
G. Schmeiser, D. Maier, M. Potulski, V. Bühren

## TECHNICAL NOTE

- 191 Quality Management in Experimental Research: a New Software to Coordinate the Timing, the Completeness and the Plausibility of Data Collection\***  
F. Böttcher, M. Breddin, M. van Griensven, D. Schneider, W. Langer, H.-C. Pape

## 193 ANNOUNCEMENT OF THE EUROPEAN TRAUMA SOCIETY

## ABSTRACTS

- 195** 19th Meeting of the Section Pediatric Trauma of the German Trauma Society, June 23 – 24, 2000, Munich, Germany
- 215** Meetings
- 216** Guidelines for Authors
